

*AMENDMENTS TO THE SPECIFICATION*

Replace paragraph [0028] with:

The device aims to create feedthroughs 3, which are grooves having a rectangular cross section in a plane perpendicular to the longitudinal direction in which the groove runs. These grooves are open at the free surface 11 and are delimited by two opposing lateral walls ~~34~~ 5 and a bottom ~~32~~ 6, as shown in Figure 6.

Replace paragraph [0040] with:

The free ends 42 make it possible to cut out the bottom ~~32~~ 6 of the feedthrough 3.

Replace paragraph [0057] with:

Finally, the cutting device 2 includes a guide T 50, having a longitudinal profile 51 with an angle bracket ~~cross section~~ and a crossbar 52 integral with the profile, ~~the~~. The base 20 ~~including detachable~~ includes means 24 ~~of~~ for detachably fastening ~~onto~~ the crossbar 52 ~~to the base, so that the crossbar 52 is adjustable with an adjustable transverse respect to distance from the profile 51.~~

Replace paragraph [0059] with:

The profile 51, as shown in Figure 2, is designed to follow an edge of the sheet of insulation 1, the horizontal wing ~~51~~ 511 being positioned on the free surface 11, and the vertical wing ~~52~~ 512 against the top edge of said sheet 1.
